PROFESSIONAL SUMMARY

Entry-level Data analytics candidate with hands-on project knowledge of SQL, Python, MySQL, Power BI, and Tableau. Skilled in data cleaning, exploratory data analysis, SQL querying, relational database design, and dashboard development. Built academic and self-driven projects involving data analysis, visualization, and business insights. Seeking entry-level opportunities in Data Analytics, Business Intelligence, Reporting, MIS, and related data-driven roles.

TECHNICAL SKILLS

Programming & Data Analysis: Python, Pandas, NumPy, Matplotlib, Seaborn
Database & SQL: SQL, MySQL, Database Design, Relational Databases, Joins, Subqueries, Aggregate Functions
Excel: XLOOKUP, VLOOKUP, INDEX-MATCH, PivotTables, SUMIFS, COUNTIFS, IF/IFS, Data Cleaning, Conditional Formatting, Charts
Business Intelligence & Visualization: Power BI, Tableau, Data Visualization, Dashboard Development, KPI Reporting
Analytics: Exploratory Data Analysis (EDA), Data Cleaning, Data Transformation, Descriptive Statistics, Correlation Analysis, Business Insights
Tools: Git, GitHub, Jupyter Notebook, MySQL Workbench

PROJECTS

Indian Automobile Market Analysis | *Python | Pandas | NumPy | Power BI*

- Performed Exploratory Data Analysis (EDA) on 15,000 vehicle records to analyze pricing, sales, vehicle segments, fuel types, brands, and EV adoption.
- Cleaned and transformed raw data using Pandas, including feature extraction and conversion of price, mileage, and EV range into analytical variables.
- Applied groupby analysis, descriptive statistics, correlation analysis, and data visualization to identify pricing and sales trends.
- Developed an interactive Power BI dashboard with KPIs, slicers, and visualizations for vehicle segments, pricing, fuel types, brands, and EV performance.

Global E-Commerce Sales Analysis | *Tableau*

- Developed an interactive Tableau dashboard to analyze e-commerce sales across categories, countries, and monthly trends.
- Created KPI cards, sales and quantity visualizations, and interactive filters for Category, Country, and Order Date.
- Analyzed 1,200 orders and ₹15.1L+ in total sales to identify sales trends and category-level performance.

Hospital Management System | *MySQL, SQL*

- Designed a 12-table relational hospital database covering patients, doctors, encounters, insurance, prescriptions, medications, tests, and procedures.
- Implemented primary keys, foreign keys, constraints, relationships, and relational database design to maintain data integrity.
- Developed SQL queries using JOINs, aggregate functions, GROUP BY, HAVING, subqueries, CASE, IN, NOT IN, and EXISTS for data retrieval and analysis.
- Created an Entity Relationship Diagram (ERD) and organized SQL scripts for database creation, data insertion, and analytical queries.

Library Management System | *Python, MySQL*

- Developed a console-based Library Management System using Python and MySQL with separate Admin and Member workflows.
- Implemented CRUD operations for books and members, including issue, return, and payment/due tracking.
- Applied Object-Oriented Programming (OOP) and integrated MySQL Connector/Python for database connectivity.
